Craftsmanship

All Guardian decorative glass lites are hand assembled by craftsmen and will offer minor differences from piece to piece. The process of manufacturing the art glass used in each glass lite creates random patterns which ensure that each glass lite is unique.

Guardian art glass gains its visual character through wavy textures, lines and striations, random air bubbles and a variety of other natural imperfections, which add to the unique character of each piece of glass. No two glass lites are ever identical.

Ultimate Astragal

When homeowners were asked what door system problems they have the most trouble with they cited: French doors – hard to get a good seal in the middle. This never has to be an issue again with the use of Endura's Ultimate Astragals, featuring the patented three-point sealing system that keeps water, air and daylight outside.

- **Patented three-point sealing system**—eliminates water and air infiltration
- **Retractable floating boot**—provides a lasting seal
- **Easy installation**—save time and money

Floating Boot Up
Lifts with flush bolt to clear the threshold.

Floating Boot Down
Secures in place when the flush bolt is lowered.

FrameSaver®

FrameSaver Door Frames

FrameSaver® has been designed and manufactured to withstand time and the elements with a lifetime warranty against rot or insect damage.

- **Field Proven:** Over a decade of "non-rot" performance
- **FrameSaver® Lifetime Warranty**
 - Will not rot or decay
 - Fully transferable
- **Easily identifiable FrameSaver® Brand stamped right onto product**
 - Ensures the quality
- **Finishes and paints just like wood**
- **Composite material is finger-jointed to wood for a perfect fit that maintains the frame's structural integrity**
 - Extremely strong and durable

- **Patented composite bottom won't absorb water so it won't rot**
 - Won't wick water or swell
 - Rot never begins

U.S. Patents: 6,446,410; 5,661,943;
5,873,209; 6,122,882

When It's Time to Replace the Old and Welcome the New...

The first thing people notice about any house is the front door. Chipped, warped, out of style, the wrong style. What does your door say about you?

Now there's an easy way to improve the looks, security and energy efficiency of your home. Welcome to Guardian steel replacement doors. Choose from many door styles and dozens of beautiful glasslite inserts. Enjoy the security that a steel door and frame can bring to your home. Guardian replacement doors prehung in a steel frame surpass the most stringent forced entrance security tests. Discover the energy-saving advantage of a door that seals as tight as a refrigerator with its magnetic weather-stripping and adjustable threshold.

Professional Installation Ensures Satisfaction

These beautifully designed top quality replacement doors are prehung in a steel frame that is engineered to fit over your existing wood frame. This design allows the qualified professional remodeler to replace your old door with a minimum of mess. And Guardian's exclusive adjustable hinge plate system ensures a perfect fit every time.

Steel Replacement Frame
The heavy duty 18 Gauge Steel Frame provides the highest security rating in the industry.

Guardian Steel & Fiberglass Doors

Extra Features, Extra Benefits

Two-Piece Unitized Steel Construction

All Guardian Steel Doors are manufactured with a two-piece unitized construction for durability and strength. The heavy 22 gauge hot-dipped galvanized steel is 50% thicker than a standard steel door found at many home centers.

Energy Efficiency

All Guardian Steel Doors are fully insulated with an inner core of environmentally friendly polyurethane foam for a R-value of 13.0, more than four times that of a wood door! A foam-filled interlock provides for a thermal break.

The Steel Edge Advantage

All Guardian Steel Doors feature an all steel-edge construction – there are no wood edges which can be cracked when force is applied. This gives you the best security rating in the industry.

A wood edge steel door cracks under force of one hit of a 100lb. test weight.

All Guardian steel edge doors do not force open after 7 hits of a 100lb. test weight for a Grade 40 Security Rating, best in the industry.

Steel Strike Reinforcing Plate

Guardian's optional steel strike reinforcing plate attaches behind the wood strike jamb for additional security.

Composite Fiberglass Door Construction

Full Length Composite Stiles

Fiberglass Reinforced Skins

Polyurethane Core

Engineered Composite Top & Bottom Rail

- 20" Extended Lockblock
- Environmentally Sound Polyurethane Foam Core

Exclusive Slide-on Door Sweep

The slide-on bottom sweep seals out the weather and can be easily replaced.

Adjustable Riser

Thresholds with a riser can be easily adjusted with a screw driver to meet the weather strip on the bottom of the door to create a tight weather-seal.

Stainable Steel Entry Doors That Welcome You Home

You can have all the features of a Guardian steel door... the strength, durability, security and the patented adjustable hinge *plus* the deep, rich beauty of a textured wood-grain finish that looks and stains like real wood. *That's Stainable Steel from Guardian!*

Guardian Stainable Steel doors have a classic wood-grain texture deeply embossed directly into the steel facing. This wood graining matches the architecturally correct style and rail graining found in real oak doors. A special topcoating is applied that permanently bonds to the steel and accepts stain to give you a real wood look. Your new Stainable Steel door can also be painted to match any trim.

Patented Adjustable Hinge Plate System

Guardian's unique patented Adjustable Hinge Plate System offers built-in advantages unmatched in the industry. The Adjustable Hinge Plate – which is located inside the door at each hinge – makes it possible to adjust the door up or down, in or out. This is important because improper door alignment could cause the weather-strip seal to break, allowing outside air to enter or heat to escape.

All that's needed is a screwdriver! You get a tight fit – top to bottom, side to side – without removing the door from its hinges. The adjustment can be made at installation or at anytime in the future, if the climate or normal settling should affect the door opening.

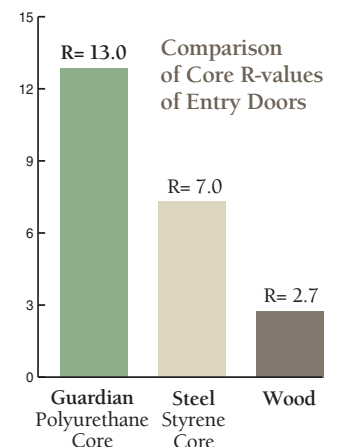

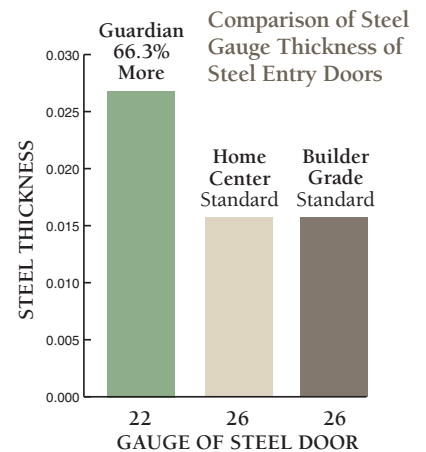

Decorative ball bearing hinges to match lock hardware standard.

Exclusive hinge plate adjusts up or down and in or out.

T-nuts are used on door jambs for attachment of hinge screws. This keeps screws from stripping, for years of trouble-free performance.

Paris COLLECTION

PRIVACY RATING 4

- Clear Bevels
- Arctic Glass
- Clear Renaissance Glass
- Patina Caming

Reflecting a state of contemplation, serenity and repose, the Paris Collection is inspired by artisans who truly appreciate beauty in objects for everyday use. Deep bevels, graceful contours, and caming lend a feeling of handcrafted antiquity.
